

Big Lake

Where: Northeast of SFN's current IR 169

Size: 193.17 ha

Reasons for Selecting:

Big Lake has a long and documented history of continuous, and intensive, occupation and use by SFN. The Provincial Recreation Site on Big Lake was established over the top one of SFN traditional campsites. SFN would like to protect their selection at Big Lake for the use of future generations. SFN's intention for this selection, is to revive whatever traditional campsites remain outside the recreation site. Potentially, SFN will build several cabins for their members to use. SFN would also like to see this land used as a place to pass on their culture, language and traditions to their youth.
