Ministry/Agency	B.C. Ministry of Forests, Lands, Natural Resource Operations and Rural Development
Description	<p>In 2017 BC and Canada collaborated to draft a Section 11 Agreement for the conservation of the Central Group of Southern Mountain Caribou (SMC). In September 2017 through the public engagement that was done on the Draft Section 11 Agreement, West Moberly First Nations (WMFN) and Saúlteau First Nations (SFN) asked to participate in the Agreement given their experience in caribou recovery. As the Section 11 Agreement falls under the Federal Species at Risk Act, Environment and Climate Change Canada (ECCC) recommended that a separate Partnership Agreement (PA) be formed for the Central Group and incorporate Canada, BC, WMFN and SFN. At this time ECCC also expanded the scope of the Section 11 Agreement to cover all Southern Mountain Caribou. Negotiations on both the Partnership Agreement and the expanded Section 11 Agreement ensued through winter 2018 to February 2019.</p> <p>The PA is separate from but closely related to draft Section 11 Agreement between BC and ECCC. The Section 11 Agreement sets out short, medium, and long-term targets and immediate caribou recovery measures across all Groups of Southern Mountain Caribou and aims to reverse the population decline. Proposed measures in the draft PA apply to the Central Group of SMC only.</p> <p>BC and Canada led engagement on the Sec. 11 bi-lateral conservation agreement and the PA agreement in April/early May of 2019. During engagement in the Northeast, concerns were expressed by members of the public, local municipalities, and some industry and recreation sectors citing a need for transparency and participation in PA agreement negotiations and the terms of reference for a socio-economic assessment of impacts of potential habitat protections for caribou.</p> <p>Since the engagement sessions in spring, 2019, BC has taken several steps to address concerns raised including extending the engagement period, appointing</p>

DRAFT SEC. 11 AND DRAFT PARTNERSHIP AGREEMENT UPDATE

	<p>Blair Lekstrom as community liaison, implementing an interim moratorium in High Elevation Winter Range across the Central Group of caribou while issues regarding the PA are addressed, and appointing two facilitators, Lorne Brownsey and Patrick Kelly, to bring together leaders from the Saulneau and West Moberly First Nations, the Province, community leaders and key stakeholders.</p> <p>A leadership table occurred in Vancouver on November 29, 2019. Lorne Brownsey and Patrick Kelly facilitated the meeting, which was attended by senior representatives from Saulneau First Nation, West Moberly First Nation, forestry, mining and oil and gas industries, local governments (including the Peace River Regional District), the BC government, and the Canadian government. The Leaders discussed how best to move forward with the Partnership Agreement. Leaders discussed the need to establish mechanisms for further work on racism and the development and maintenance of community relations, backcountry access for recreation, and mitigating socio-economic impacts.</p> <p>On January 17, 2020 BC confirmed that three working groups would be struck to support implementation of key commitments in the agreement.</p> <p>On January 23/24<sup>th</sup>, 2020 initial meetings of three Working Groups (Snowmobile Advisory Committee, Land Use Objectives WG and a Socio-Economic WG) occurred in the Northeast. Participants of the Snowmobile Recreation WG consist of representatives from regional snowmobile clubs, the BC Snowmobile Federation, First Nations, local governments, Canada and BC. The Land Use Objectives and Socio-Economic WG’s are represented by a combination of First Nations, Industry stakeholders, local government, Canada and BC. A second face to face meeting of the Snowmobile Recreation WG is scheduled for February 27, 2020 and a second meeting of the Socio-Economic WG is scheduled for February 28, 2020 via teleconference. Participants in these WG’s are eager to work towards solutions.</p> <p>On February 21, 2020 the tripartite Partnership Agreement was signed by all Parties (West Moberly First Nation, Saulneau First Nation, Canada and BC) and the bilateral Section 11 Conservation Agreement was also signed by Canada and BC. Amendments to the agreements from the original drafts primarily relate to updating dates and work that has transpired since drafting. One key change in the Partnership Agreement was recognition that some application reviews by the Caribou Recovery Committee would need consultation with local governments. The Parties to the agreements are now focused on implementation of the Agreements.</p>
