Archaeology sites IjSs-1, IjSs-8 and IjSs-9 are determined to be outside of the current project proposed impact areas and as such no further archaeological work is recommended for them. Archaeology site IjSs- 2 could not be relocated at the time of survey but is suspected to remain within the project proposed improvement area along the northern shore of the Liard River in proximity to the boat launch area. Management recommendations for IjSs-2 include avoidance with a 10 m buffer or monitor construction and ground disturbance activity under a Section 12.4 Site Alteration Permit

This is from the Skooks Archaeology report. Basically the parking lot development with outhouse, picnic tables etc. has no concerns.

The other site was somewhere near the shore, but they couldn't even find it, so probably means keep an eye out or maybe need that 12.4 permit? Not sure. Denise do you have someone to ask about this?
