- Operational Implementation
 - Timelines
 - Contractor

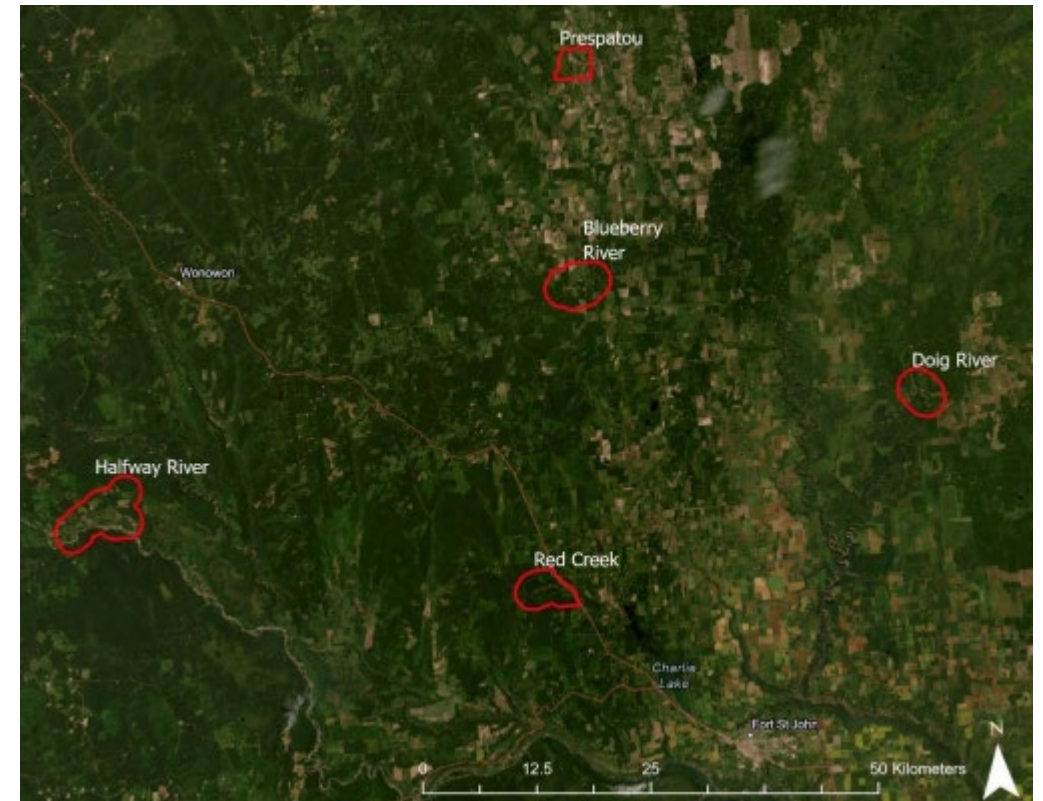

Background

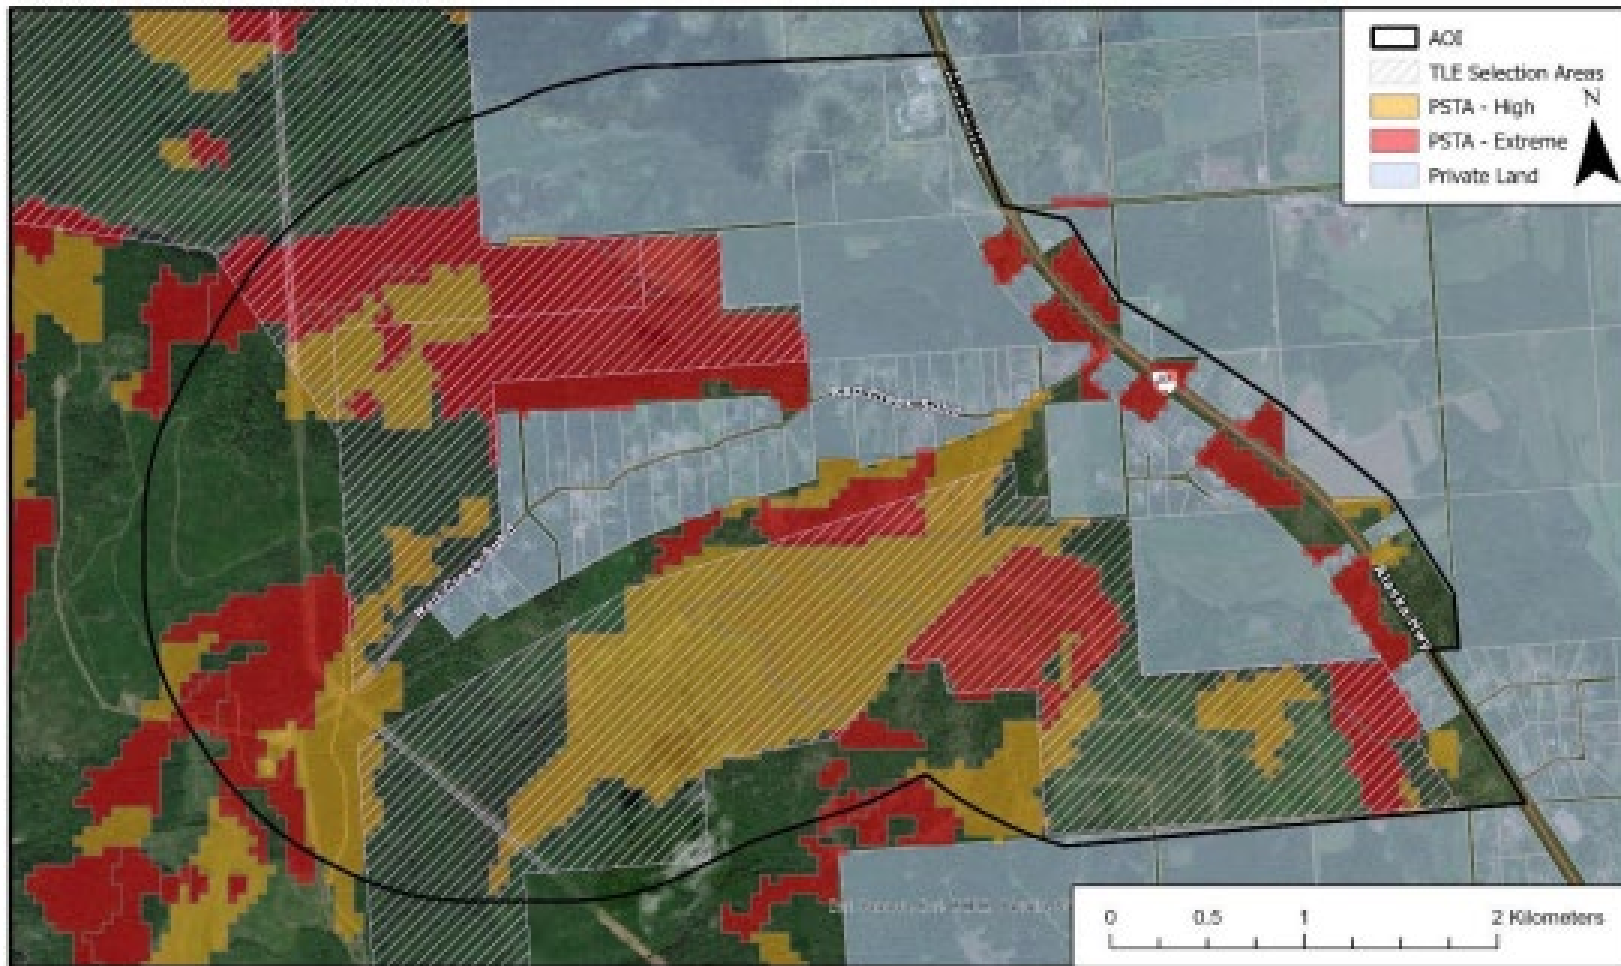

June 30, 2021 – Powerful windstorm resulted in catastrophic windthrow in several North Peace communities, including Red Creek.

March 9, 2023 – Tactical assessment completed of five communities concluded that Red Creek was a priority for treatment.

November 14, 2024 – Ironhawk Fibres broke ground and started road construction and operational treatments.

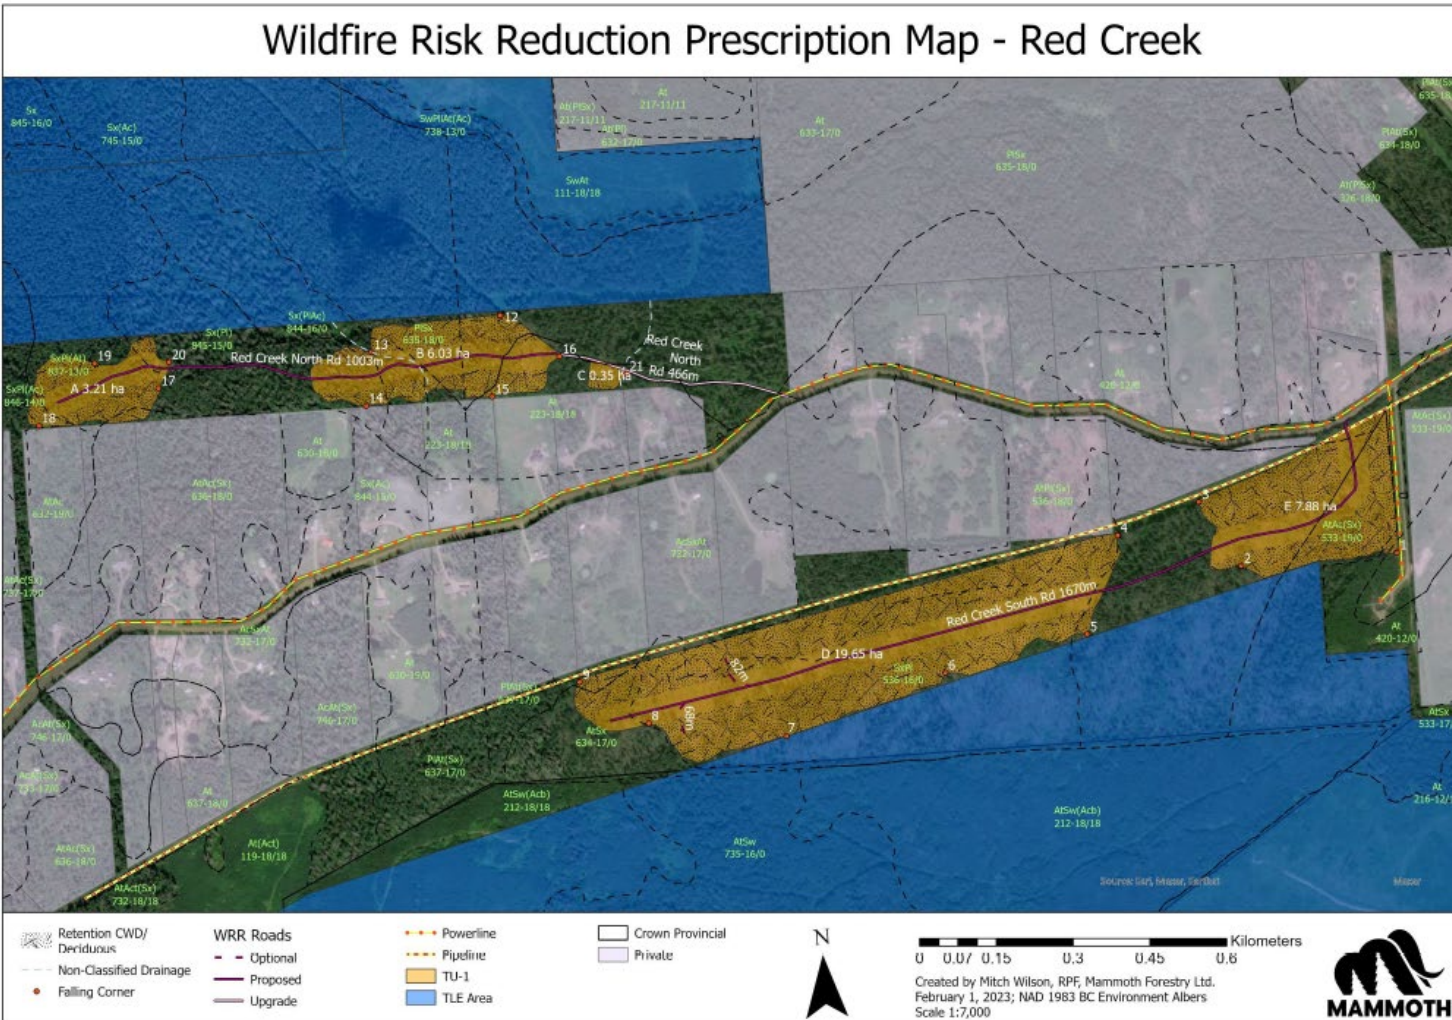

Risk Assessment – Red Creek

Red Creek Community

Wildfire Risk Reduction Prescription Map - Red Creek

- Community updates via emails
- Community meeting at Charlie Lk hall
- Field Tour once operations were underway and it was safe to bring folks on site.

Implementation

- 2.5km's of road construction and reconstruction
- 37 hectares to treat
- retained standing live trees where safe sensical.
- Salvage merchantable timber where available
- Secondary Fibre utilization
- Create fire break between timber and private property
- Deactivate and rebuild roads to reduce recreational traffic to the area after treatment
